CERTIFICATES

Digital Academy By Capgemini
Bangalore., Karnataka

Jun '23 - Dec'23

Completed a comprehensive Java Full Stack Development Course, Proficient in Java programming language for both front-end and back-end development.

C-Language
Anantapur, Andhrapradesh

Jun '20 - Apr '21

- Strong understanding of C fundamentals, including data types, control structures, and functions.
- Familiarity with software development practices and coding standards in C.

PROJECTS

MAJOR PROJECTS:

1. **“Electrical Vehicle Fast Charging Station By Using DC Micro Grid.” [2022-2023]**
 - DESCRIPTION: Integration with the dc micro grid will enable the fastcharging station using micro grids to dynamically adjust the power output based on the availability of renewable energy sources and the demand for charging. This will optimize the efficiency of the charging process and reduce the strain on the power grid during peak loads.
2. **“Hospital Management System”[2023]**
 - DESCRIPTION: A Hospital Management System is computer software that helps hospitals and healthcare facilities manage their day-to-day operations efficiently, including patient records, appointments, billing, and inventory.
3. **“ONLINE GROCERY MANAGEMENT SYSTEM”[2023]**
 - DESCRIPTION: An Online Grocery Management System is a digital platform that allows customers to browse, order, and manage grocery shopping online, providing convenience through features like virtual carts, secure payments, and delivery tracking.

TECHNICAL SKILLS

Programming Languages : C, Core Java,

development skills: HTML, CSS.

Software: Visual Studio, MySQL Workbench.

Databases: MySQL.

Interests: Technology Blogging, Continuous Learning, Web development.
